## **Survival Surgery Checklist**

For use during semi-annual Quality Assurance visits by UCI Veterinarians

PI:		IACUC Protocol #(s):
Date	of visit:	Performed by:
Lab m	nembers	present:
Yes	No	
O appro & car	-	Does IACUC protocol(s) adequately describe proposed procedures, including testhesia and analgesic use, aseptic technique, surgical procedure, & post-op monitoring
$\bigcirc$	$\bigcirc$	Are procedures performed described in protocol(s)?
O docur	Omented?	Are all members performing surgery adequately trained? Is training appropriately
$\bigcirc$	$\bigcirc$	If using gas anesthesia, is equipment maintained properly? Is WAG properly managed?
$\bigcirc$	$\bigcirc$	Are all drugs within current dates? Are they properly prepared and stored?
$\bigcirc$	$\bigcirc$	Is surgical space adequate, including cleanliness?
$\bigcirc$	$\bigcirc$	Are surgical & anesthetic records adequate?
$\bigcirc$	$\bigcirc$	Is post-op monitoring occurring adequately and records indicate so?
O anima	O al prepara	Is appropriate aseptic technique being used, including use of sterile gloves, proper ation, instrument prep and use, & appropriate draping?
$\bigcirc$	$\bigcirc$	Is eye lubrication being used?
$\bigcirc$	$\bigcirc$	Are animals being kept warmed during and after surgery?
○ moist	_	Are any ancillary methods used to increase animal comfort post-op used, such as d and/or soft bedding?
$\bigcirc$	$\bigcirc$	If single housed post-op, are animals group housed after suture removal if possible?
$\bigcirc$	$\bigcirc$	Are skin sutures removed 10-14 after surgery if survival is over 28 days?
$\bigcirc$	0	Have any complications occurred in past? If so, describe
