## Do I need to submit an hSCRO protocol or modification? Do you intend to use existing pluripotent human embryonic cells (hESCs) or generate new hESCs? (pluripotent=can differentiate into all 3 germ lineages) No Do you intend to generate new human nduced pluripotent Stem cells (hiPSCs) lines? (pluripotent=can differentiate into all 3 germ lineages) No Yes Yes Do you intend to use an existing hiPSC line in your lab for the first time? Yes No Do you plan on using cells **Derived from human** Please submit an Yes Fetal material? **hSCRO** Protocol or modify an existing protocol. No Yes (Refer to Provenance policy document, IBC) Are the cells multipotent? and/or IRB approval may still be required) (can give rise to Two or more cell types) Are the cells multipotent No **Neural Stem Cells?** Yes No Yes Do you intend to Transplant them into an animal? No An hSCRO Protocol is Not required. However, IBC approval and/or an IRB **Exemption may still be needed**
